PROFILE

Motivated Fresher with a strong background in Computer Engineering . Proficient in Programming and Project Management . Committed to delivering a high-quality solutions , driving technological advancements , and embracing challenges.
Dedicated to contributing effectively to organizational goals with innovative approaches.

INTERNSHIPS & COURSES

COMPLETE WEB DEVELOPMENT BOOTCAMP FROM UDEMY

- I've completed my Web-development course from the 'UDEMY ' online platform
- I gained Knowledge about the Frontend , Backend and Databases domain.
- Here I learned the HTML, CSS , Javascript and Bootstrap.

DATA TABLEAU WORKSHOP

- I learned the basics of Data Tableau a Data Visualization Tool

EXCEL ESSENTIALS FORMULA AND FUNCTIONS FROM JOBAAJ LEARNINGS

- I learned the basic of MS Excel with the important Formulas and Functions.

V-ANALYTICS PVT LTD NASHIK

- Here I Worked on Machine Learning and Data Science Project. Implanted training on " CREDIT APPROVAL SYSTEM " Project.

PROJECTS

1. **PREDICTION OF HEART DISEASES USING DATA MINING NAIVE BAYES ALGORITHM**

- In this Project i learned about predicting the heart diseases using data mining techniques . Like Heart Diseases we can also predict other diseases . Implemented the Naive Bayes Algorithm to solve the problem statement.

2. **CREDIT APPROVAL SYSTEM USING DECISION TREES**

- As we all know due to increasing financial frauds and scams in the economical institutions we developed this system which will tell us whether to approve a client a loan or not based on the credit score. This will help a lot to bring in control of the financial scams.
