- SSIS (SQL Server Integration Services)

WORK EXPERIENCE

TJSB Sahakari Bank Ltd.

Junior Officer (E-1)   **August 2021 – Present**

- Involved in database development by creating SQL queries, PL/SQL functions, and procedures.
- Retrieving data from the Oracle database
- Working with the SQL loader and control files to load the data into different tables.
- Produce reports for users of the branch and offer data for various uses.
- Use the Microsoft Report Builder Tool to create reports and enhance them.
- I currently work in the CBS Project of the Bank in Report Teams.
- Validate reports in TCS Bancs software for a new CBS project.
- Create different scenarios to test those reports and do report validation in TCS Bancs.
- Running the batch process in Jenkins and SOS Berlin software's to test the reports.
- Use Bugzilla software to raise bugs in TCS Bancs reports.
- Analysis of various ODS for the purpose of report development.
- Contributed to various regulatory reports.
- Created and executed test cases for both Internet and mobile banking.
- For the production of a CBS Project report, I'm learning Jasperoft Studio. Few reports have currently been created in the test area.
- For the Data Warehouse, check multiple views in the UAT and Production databases to ensure that the fields are matched with the front-end and identify any gaps between them. Furthermore, verify that the data generated in the views corresponds to the data displayed on the front end.
