- **G.D. Sawant Arts, Science & Commerce College, Nashik** 2017
HSC Science Percentage: 82

ACADEMIC PROJECT

Skill Link - Linking Needy to Employment

Full stack web application

[GitHub](#)

- Utilized both Java (J2EE, SpringBoot, JPA/Hibernate) and .NET (ASP.NET Core, Entity Framework) technologies for backend development with RestAPI and MySQL. Implemented frontend components using ReactJS, HTML, CSS, and Bootstrap to enhance the user experience.
- Skill-Link is to provide services to consumers through an user friendly technology-enabled platform. The application aims to simplify the process of finding and booking reliable service providers for various services such as cleaning, home repairs etc.
- The projects also aims to empower our unskilled local workers by providing employability to them. Overall, our objective is to become the go-to destination for service needs.

Task Management System

[GitHub](#)

- Tools and technologies used: Java, SpringBoot, RestAPI, JPA/Hibernate, ReactJS, MySQL
- The Task Management System is a full-stack application designed to empower users to efficiently organize their tasks.
