Project :

Spotify Clone

- Developed a Spotify clone using HTML, CSS, and JavaScript, replicating key functionalities like music playback, playlist creation, and search capabilities.
- Designed a responsive and intuitive user interface using CSS Flexbox and Grid, ensuring a seamless user experience across various devices.
- Implemented a custom audio player with JavaScript, providing features such as play/pause, volume control, and progress tracking for an interactive listening experience.

AI Buddy (AI Voice Assistant)

- Developed an AI Buddy chatbot using Python and Natural Language Toolkit (NLTK), enabling intelligent conversation capabilities with features like sentiment analysis and context-aware responses.
- Implemented machine learning models with scikit-learn to enhance user intent recognition and response accuracy, leveraging training data for improved performance.
- Integrated the chatbot with a Python-based web framework like Flask to create a user-friendly web interface, providing real-time interactions and seamless deployment.

E-Commerce Web Application

- Developed a fully functional e-commerce web app using HTML, CSS, and JavaScript, featuring product listings, shopping cart, and checkout processes.
- Designed a responsive and user-friendly interface with CSS Flexbox and Grid, ensuring optimal performance on both desktop and mobile devices.
- Implemented dynamic features such as product filtering, search functionality, and real-time cart updates using JavaScript to enhance user experience.
