OBJECTIVE

Goal-oriented professional with 3 years of experience in the Fintech industry, specializing in Reference Data Management, Entity Master, and Product Master for Golden Source clients such as Aware Super and Deutsche Bank. Experienced in managing financial data, data integration, and system optimization. Proficient in Oracle, PostgreSQL, PL/SQL, Excel, and data visualization tools, with a strong focus on delivering efficient, innovative solutions in a collaborative team environment.

PROFESSIONAL EXPERIENCE

Golden Source International Pvt Ltd

Associate Software Engineer

Andheri

Jan 2024 - Present

- Evaluated and mapped the data management requirements for Deutsche Bank and Aware Super the functionalities of GoldenSource EDM, enabling efficient integration and streamlined data operations.
- Managed and implemented the publishing of inbound and outbound data flows, utilizing Mapping Designer to meet specific client requirements and ensure seamless integration.
- Gained a deep understanding of vendor fields from Bloomberg, Refinitiv, Markit, and IDC, classifying them into Reference Data, Pricing Data, and Key Figures.
- Led the implementation and documentation of Corporate Action reference data setup for Aware Super superannuation funds, utilizing Mapping Designer, Orchestrating Workflow, and PostgreSQL features such as Procedures, Cursors, Materialized Views, Complex Views, and publishing profiles.

Golden Source International Pvt Ltd

Junior Software Engineer

Andheri

Jan 2022 – Dec 2023

- Collaborated with Golden Source clients, including Deutsche bank to gather business requirements and implement project specifications.
- Enhanced API performance through debugging, optimization, and rigorous testing.
- Processed position and balance data using Mapping Designer, loading it into queues for further processing, and managed IRDS (Interest Rate Derivatives) data to calculate daily interest rates.
- Conduct unit testing and performance tuning to ensure efficient, reliable code.
- Manage production deployments across SIT, UAT, and Production, resolving issues quickly to ensure stability.
- Use SVN for version control, actively participating in code reviews to maintain high-quality code standards.
- Maintain comprehensive documentation, test evidence for transparency and compliance.
- Utilized Project management tools (Confluence, Jira) for project planning and tracking.
